TITLE : CULTURE SOIL

ABSTRACT : PURPOSE: To obtain culture soil which is a water-containing mixture of palm powder obtained by cutting palm skin and peat-moss at a specific ratio, excellent in uniformity of quality and growth in budding and improved in seedling raising efficiency and useful for farm household cultivating fruits and vegetables.

CONSTITUTION: This culture soil comprises a water-containing mixture of (A) 80-60wt.% palm powder obtained by cutting palm skin with (B) 40-20wt.% peat- moss. Furthermore, a mixture of the culture soil with ≤ 10 wt.% of small amount of pearlite or vermiculite is preferably used as the culture soil.
